About Chilmark Research

Chilmark Research is a global research and advisory firm whose sole focus is the market for healthcare IT solutions. This focus allows us to provide our clients with the most in-depth and accurate research on the critical technology and adoption trends occurring throughout the healthcare sector. Areas of current research focus include among others: Health Information Exchanges, Cloud-computing Models for Healthcare, IT-enabled Accountable Care Organizations, Employer Needs for Health & Wellness Apps, Adoption of Mobile Technology and Consumer-facing Apps (Personal Health Records).

Using a pragmatic, evidence-based research methodology with a strong emphasis on primary research, Chilmark Research structures its research reports to serve the needs of technology adopters, consultants, investors and technology vendors. In addition to reports for the general market, Chilmark Research performs research for clients based on their specific needs. Such research has included competitive analyses, market opportunity assessments, strategic assessment of market and vendors for partnership and/or acquisition.

Chilmark Research is proud of the clients it has had the pleasure to serve including Bluetooth Special Interest Group, Cerner, IBM, Kryptiq, McKinsey, Microsoft, and Thomson Reuters to name a few. It is our hope that at some future date we will have the pleasure to serve you as well.
